THE TYPE OF THE GENUS PEZOCATANTOPS DIRSH 1953

BY

V. M. DIRSH

Anti-Locust Research Centre, British Museum (Natural History), London, England

In the diagnosis of my genus *Pezocatantops* (*Tijd. Entom.*, vol. 96, 1953, p. 235), the genotype is cited as "*Catantops* (*Vitticatantops*) *congoensis* Sjöstedt 1929", as a result of a printer's error, unfortunately overlooked when the proofs were corrected. The genotype designated in the original typescript and which is here officially designated is *Catantops* (*Vitticatantops*) *lobipennis* Sjöstedt 1933.

On p. 234 of the same paper the heading "*Catantops* Ramme 1929" is a printer's error for *Catantopsilus* Ramme 1929.
